
FOR IMMEDIATE RELEASE:

Trinisys Named To The Nashville Area Chamber's Future 50

Nashville, TN – September 15, 2010

Trinisys LLC has been named a 2010 Future 50 Winner. This program identifies and celebrates the 50 fastest-growing, privately held companies in the Nashville area. To be eligible, companies must be privately owned; be headquartered in Middle Tennessee; have at least 10 employees or annual revenues of at least \$500,000; and anticipate revenue and employment growth for the next three years.

"Future 50 companies are a testament to the ideal business climate in Middle Tennessee. The success of these companies helps drive economic growth in this area," said Chamber president & CEO Ralph Schulz. "The success of these companies reinforces Middle Tennessee's reputation as a good place to start and grow a business. It's important that we recognize these companies for the contributions to our community." The winners have contributed to economic growth in areas such as health care, technology, construction, manufacturing, finance, retail and services.

"We are extremely pleased to be identified as one of Nashville's fastest growing companies" says Principal and Co-Founder, David Box. "Our talented team is unparalleled in their work and dedication to our clients and it is very gratifying to see that effort recognized."

Trinisys will receive recognition as a Future 50 company at an awards dinner on Thursday, Oct. 21, at the Renaissance Nashville Hotel. Launched in 1992, the 2010 Future 50 Awards are presented by the Nashville Area Chamber of Commerce, in partnership with Bank of America. For a full list of 2010 Future 50 Winners head to the Nashville Chamber www.nashvillechamber.com.

About Trinisys

Trinisys revolutionizes the way businesses collect and process information. Clients have drastically reduced the time and cost involved in acquiring data from paper and the web with Trinisys' innovative data capture software. The Trinisys integration engine enables companies to automate complex business processes and get data to the systems they use every day.
