trinisys
ClearView™
Legacy Archive Solution

Trinisys is a leading provider of enterprise data migration, integration, normalization, and workflow automation. ClearView LAS revolutionizes the way healthcare organizations traditionally aggregate, process and access historical clinical information from disparate legacy systems.

ClearView LAS Benefits

- Consolidate non-strategic and disparate clinical systems, quickly and economically

- Fully secure data both in motion and at rest

- Robust search capability across multiple locations and systems

- View detail to the encounter or document level

- Select required role and purpose to automate release of information and other additional workflows

- Configurable user access and audit reporting

trinisys®

Diverse Needs. Actionable Data.
HIPAA Compliant. One Flexible Solution.

Traditionally, when faced with the issue of managing patient data, providers thought they only had three options: convert some, convert none, or convert all information. Therefore, some organizations only convert the bare minimum in order to accelerate conversion time, severely curbing the benefits gained.

ClearView LAS (Legacy Archive Solution) is the complete, secure solution for legacy data archival, migration and translation, and normalization. This solution allows providers to securely access and report on patients' full historic health records (clinical and financial) directly from their current EHR platform. Utilizing efficient single sign-on capabilities via active directory authentication, clinical teams and HIM professionals have a single source of truth for patient data. ClearView LAS also provides the organization with an added layer of security for static data with automated audit detail that exports to compliance management applications like FairWarning and others.

Our depth of experience with health systems' enterprise needs makes us uniquely positioned to help identify data migration, conversion, storage and access requirements, and then create the best solution to fit those needs. To date, Trinisys has integrated with over 150 electronic health (EHR) and Practice Management (PM) systems.

ClearView LAS Features

- Single Sign On (SSO) & Active Directory Integration
- Direct Access from current EHR
- Robust multi-data point search functionality
- Full audit capabilities & export to monitoring services
- Admin control of user permissions/roles
- Full legal patient record
