

Scalable. Streamlined. Secure.

Trinisys is revolutionizing the way healthcare organizations traditionally aggregate, process and access historical clinical information from disparate legacy systems.

Introducing ClearView™- Historical Clinical Record Solutions

Optimize Resources

Eliminate non-strategic systems and related costs for support/maintenance and integrate data in current systems.

Impact Workflow

Get easy access to historical clinical records in your EHR to support daily workflow and enhance patient care.

Increase Productivity

Automate Release of Information tasks with advanced search and complete data presentation.

Diverse Needs. One Flexible Solution.

Health Systems have many needs when dealing with legacy systems and the various data stored in those systems. Our depth of experience with health systems' enterprise needs makes us uniquely positioned to help identify data migration, conversion, storage and access requirements, and then create the best solution to fit those needs.

Key Challenges ClearView Solves

- Significant **maintenance and support costs** for legacy systems.
- Lack of **timely, at-your-fingertips access** to complete historical patient records.
- **Productivity and staffing** issues related to the arduous task of manually retrieving data for Release of Information requests.
- Data silos or inability to **aggregate disparate data** for effective use in patient care and analytics.
- Risk to PHI associated with **poor security** on non-compliant legacy systems.

ClearView Delivers

- Single sign on provides direct access from EHR
- Security levels based on source system, document/record type, or user
- Active Directory integration
- Full audit capabilities
- Extensive and Customized search criteria and data presentation
- Consolidated view of data from multiple source systems
- Bundle multiple documents as part of information requests for one-click workflow
- Import/conversion of numerous source image and document formats
- Rapid deployment
- Tiered pricing models

Quantifiable Benefits

One national health system projects savings of approximately **\$20 million** in annual maintenance costs by retiring legacy systems. That same organization anticipates increasing efficiency **60%** by eliminating expenses associated with maintaining hundreds of EHR systems.

About Trinisys

Trinisys is a leading provider of enterprise data migration, integration and web application solutions for the healthcare industry. We convert, connect and combine data to automate manual processes, extend existing systems and develop web solutions that improve processes and optimize resources. Our success is based on the company's philosophy and work culture that drives continuous innovation of quality software that addresses real businesses challenges. Trinisys connects systems to systems and people to systems.
